At the Meeting

Please contact the technician well in advance of your talk (minimum 30 minutes before the start of your session) to ensure that your file has been successfully read.

Presentation times

Please refer to your correspondence with the meeting organisers if you are uncertain about how long you have been allocated for your talk.

- Invited speakers: 20 minutes for presentation followed by panel discussion at end of session
- Oral communications: 10 minutes total, 7 for presentation and 3 for questions
- Oral posters: 5 minutes total, 3 for presentation and 2 for questions
- Clinical cases: 15 minutes total, 8 for presentation and 7 for discussion

Oral posters

- Timekeeping is even more important
- Sit in the front row of the auditorium and be ready to move quickly to the stage as the previous speaker is finishing
- 3-5 slides maximum

Please note – you will be stopped if you over-run your presentation time!

Slide content and design

- Material on slides must be of an adequate size to be seen clearly by all delegates.
- It is recommended that each slide contains no more than seven lines of text and no more than seven words per line.
- If showing graphs, tables or charts:
Do not make them too crowded
Complex figures should be broken up into series
Limit the number of captions
Use rounded figures
- As a rough guide, we suggest you allow no more than two slides per minute of your talk.
- Slides are easier to read when there is a high contrast between the text and the background. Yellow or white text on a mid to dark blue background works particularly well. Avoid black text on a white background (eg photographs of typed pages).

Disclosure

All presenters must include details of any potential conflicts of interest on their slides or posters. You must include details of any company support given, whether in conducting the research, analysing the data or preparing the presentation.
